

# THE JAS EZ FINGER

## ADVANCED TURNBUCKLE TECHNOLOGY

The JAS EZ Finger offers full-range, bi-directional PIP Range of Motion (ROM) therapy – 100° flexion, 10° hyperextension – in a lightweight, low-profile, single-patient use device. An innovative motion tower design, combined with infinitely adjustable ROM, assures precise end-range stretch throughout the entire treatment session. Maximal Total End Range Time (TERT) is achieved for optimal therapeutic benefit.

### JAS QUALITY AND PERFORMANCE IN A SINGLE-PATIENT USE DESIGN

#### Safe and Effective ROM Therapy Following:

- PIP Contractures
- Fractures
- Dislocations
- Tendon/Ligament Repairs
- Volar Plate Injuries

Bi-directional PIP ROM

The JAS Finger ROM  
100° Flexion  
10° Hyperextension

Ready-to-Fit Hand Splint

Optimal Comfort and Compliance

The EZ Finger can be attached in four positions, allowing for treatment of all four digits. The new JAS Hand Splint is ready to fit, eliminating the need for custom fabrication.

The JAS EZ Finger utilizes proven principles of stress relaxation to achieve permanent restoration of joint ROM in three 30-minute sessions per day.

Features:	Benefits:
Includes Hand Splint	Stabilizes device, maintains proper alignment, prevents rotation during ROM therapy
Lightweight, easy to apply and simple to use	Optimizes patient compliance
Works in PIP flexion and extension	Saves cost; full-range stress relaxation therapy in one device
Patient-controlled, infinitely adjustable ROM	Assures precise and pain-free end-range stretch; virtually eliminates muscle guarding
Fulcrum positioned away from joint	Eliminates joint compression
